EXPERIENCE

TURK TELEKOM

Data Analytics Intern

Istanbul, Turkey

Aug 2025 - Sep 2025

- Engineered Python web-scraping pipelines that produced more than 1 million alternative-data observations weekly, expanding market and customer analysis beyond company-owned sources
- Improved customer-query accuracy by approximately 20% versus the prior workflow by engineering and launching RokatAI
- Enabled LLM access to internal tools and data sources through proof-of-concept MCP integrations

ALBARAKA

Venture Capital Intern

Istanbul, Turkey

Jul 2025 - Aug 2025

- Informed investment decisions exceeding \$100K by screening 10 early-stage technology companies using business-model research, DCF, comparable-company, and benchmark analyses
- Analyzed Toptan's business model, competitive positioning, and key risks to shape its SME digital-wholesale pilot, which onboarded 50 SME partners

CROPTO

Quantitative Research Intern

Istanbul, Turkey

Jun 2024 - Aug 2024

- Reduced maximum drawdown by 17% versus passive benchmarks in backtests by building Python trading and risk models for agricultural commodity-backed RWA tokens
- Tripled coverage across commodity-backed RWA tokens and cryptocurrencies by automating market-data pipelines
- Achieved a 65% directional hit rate from Jun-Aug 2024 across commodity and digital-asset forecasts published in research reports

PROJECTS & RESEARCH

- Machine Learning-Based Long/Short Equity Strategy ([GitHub](#)): Achieved a 33.67% net CAGR, 2.03 Sharpe, and -9.24% maximum drawdown in Jan 2024-Jul 2026 backtests of a leakage-controlled U.S. equity long/short pipeline using approximately 100GB of point-in-time WRDS, LSEG, and SEC data after modeled trading, financing, and borrowing costs
- SPY Machine Learning Strategy and Backtesting Research ([GitHub](#), [SSRN Paper](#)): Generated 24.6% annualized pre-cost return, a 2.17 Sharpe, and 11.4% volatility in 2023-Jun 2025 walk-forward and bootstrap tests of a LightGBM SPY/cash strategy using 17 macroeconomic and technical signals, versus SPY's 23.4%, 1.45, and 16.2%
- Sector ETF Momentum Strategy ([GitHub](#)): Returned 13.5% annually with an 18.3% maximum drawdown and 0.81 beta from Jan 2019-Jul 2025 by ranking 11 S&P 500 sector ETFs on three-month returns and rebalancing the top three monthly, versus SPY's 23.9% maximum drawdown
- Breast Cancer Genomics Research: Achieved 0.87 AUC in Oncotype risk classification using Logistic Regression, Random Forest, XGBoost, LightGBM, and neural networks on METABRIC and TCGA-BRCA data with five-fold and cross-dataset validation plus SHAP/LIME interpretation
