EXPERIENCE

TURK TELEKOM

Istanbul, Turkey

Data Analytics Intern

Summer 2025

- Engineered Python web-scraping pipelines collecting 1 million+ alternative-data observations weekly
- Built and launched RokatAI, a customer-query AI tool delivering sub-100 ms FAQ responses and bypassing live-agent queues
- Reduced manual processing time by 20% through MCP prototypes for LLM-driven data retrieval and tool execution

ALBARAKA

Istanbul, Turkey

Venture Capital Intern

Summer 2025

- Screened 10 early-stage technology companies for business viability, informing managers' \$100K+ investment decisions
- Built DCF and comparable-company valuation models supporting Investment Committee approval of an early-stage investment
- Developed and pitched Toptan's digital-wholesale pilot, secured approval, and deployed it to onboard 50 SME partners

CROPTO

Istanbul, Turkey

Quantitative Research Intern

Summer 2024

- Built Python models for commodity-backed RWAs, cutting maximum drawdown by 17% vs. passive benchmarks in backtests
- Scaled data ingestion by 200% through automation, expanding real-time inputs for backtesting and risk assessment
- Achieved a 65% directional hit rate in published commodity and digital-asset forecasts over Jun-Aug 2024

PROJECTS & RESEARCH

Learned Representations in Portfolio-ML · [GitHub](#) | [Paper](#)

Extended a reconstructed Portfolio-ML with learned scales, temporal features, valuation conditioning, and industry constraints

Annual return-risk-cost utility: 7.184% vs. 6.092% (1981-2020) | 7.012% vs. 4.832% (2021-2025)

Systematic Equity Long/Short · [GitHub](#) | [Thesis](#)

Built and retrospectively tested a point-in-time U.S. equity long/short pipeline with ML ranking and cost- and risk-aware optimization

33.67% net CAGR | 2.03 Sharpe | 9.24% maximum drawdown (Jan 2024-Jul 2026)

SPY Tactical Allocation · [GitHub](#) | [Paper](#)

Built a LightGBM SPY/cash strategy with 17 macroeconomic and technical signals; walk-forward and bootstrap tests

24.6% annualized pre-cost return | 2.17 Sharpe | 11.4% volatility (Jan 2023-Jun 2025)

Sector ETF Rotation · [GitHub](#)

Ranked 11 S&P 500 sector ETFs based on their three-month momentum and rebalanced into the top three monthly

13.5% annual return | 0.81 beta | 18.3% maximum drawdown (Jan 2019-Jul 2025)
