EXPERIENCE

TURK TELEKOM

Istanbul, Turkey

Data Analytics Intern

Summer 2025

- Engineered Python web-scraping pipelines collecting 1 million+ alternative-data observations weekly
- Built and launched RokeAI, a customer-query AI tool delivering sub-100 ms FAQ responses and bypassing live-agent queues
- Reduced manual processing time by 20% through MCP prototypes for LLM-driven data retrieval and tool execution

ALBARAKA

Istanbul, Turkey

Venture Capital Intern

Summer 2025

- Screened 10 early-stage technology companies for business viability, informing managers' \$100K+ investment decisions
- Built DCF and comparable-company valuation models supporting Investment Committee approval of an early-stage investment
- Developed and pitched Toptan's digital-wholesale pilot, secured approval, and deployed it to onboard 50 SME partners

CROPTO

Istanbul, Turkey

Quantitative Research Intern

Summer 2024

- Built Python models for commodity-backed RWAs, cutting maximum drawdown by 17% vs. passive benchmarks in backtests
- Scaled data ingestion by 200% through automation, expanding real-time inputs for backtesting and risk assessment
- Achieved a 65% directional hit rate in published commodity and digital-asset forecasts over Jun-Aug 2024

PROJECTS & RESEARCH

Learned Representations in Portfolio-ML · [GitHub](#) | [Paper](#)

Extended a reconstructed Portfolio-ML baseline with learned scales, temporal and valuation features, and industry constraints
Annual utility vs. baseline: 7.184% vs. 6.092% (1981–2020) | 7.012% vs. 4.832% (2021–2025 Extension)

Systematic Equity Long/Short · [GitHub](#) | [Thesis](#)

Built a point-in-time U.S. equity long/short pipeline with ML ranking and cost- and risk-aware optimization
33.67% net CAGR | 2.03 Sharpe | 3.37% maximum monthly drawdown (Backtest, Jan 2024–Jul 2026)

SPY Tactical Allocation · [GitHub](#) | [Paper](#)

Built a LightGBM SPY/cash strategy using 17 macroeconomic and technical signals, with walk-forward and bootstrap testing
24.6% annualized pre-cost return | 2.17 Sharpe | 11.4% volatility (OOS, Jan 2023–Jun 2025)

Sector ETF Rotation · [GitHub](#)

Built a monthly rotation strategy selecting the top three of 11 S&P 500 sector ETFs by three-month momentum
13.5% annual return | 0.81 beta | 18.3% maximum drawdown (Backtest, Jan 2019–Jul 2025)

ADDITIONAL INFORMATION

Technical Skills: Python; SQL; R; Git; Excel; Agentic AI

Libraries: pandas, NumPy, scikit-learn, XGBoost, LightGBM, PyTorch, statsmodels, CVXPY

Languages: Turkish (native); English (IELTS: 8.0); French (B2); Italian (B1)

Interests: Soccer; Music production; Tennis; Chess; Poker
