EXPERIENCE

TURK TELEKOM

Istanbul, Turkey

Data Analytics Intern

Summer 2025

- Engineered Python web-scraping pipelines that produced 1 million+ alternative-data observations weekly, expanding market and customer analysis beyond company-owned sources
- Built and launched RokatAI, a customer-query AI tool, improving accuracy by 20% and delivering near-instant FAQ responses
- Reduced manual processing time by 20% through MCP prototypes for LLM-driven data retrieval and tool execution

ALBARAKA

Istanbul, Turkey

Venture Capital Intern

Summer 2025

- Informed managers' \$100K+ investment decisions by screening 10 early-stage technology companies for business-model viability and competitive positioning
- Built DCF and comparable-company valuation models that supported Investment Committee approval of an early-stage technology investment
- Developed and presented Toptan's SME digital-wholesale concept, secured project approval, and deployed a pilot that onboarded 50 SME partners

CROPTO

Istanbul, Turkey

Quantitative Research Intern

Summer 2024

- Reduced maximum drawdown by 17% versus passive benchmarks in backtests by building Python trading and risk models for agricultural commodity-backed RWA tokens
- Scaled data ingestion by 200% through automated pipelines, expanding the real-time inputs available for strategy backtesting and risk assessment
- Achieved a 65% directional hit rate from Jun-Aug 2024 across commodity and digital-asset forecasts published in research reports

PROJECTS & RESEARCH

- Machine Learning-Based Long/Short Equity Strategy** ([GitHub](#)): Achieved a 33.67% net CAGR, 2.03 Sharpe, and -9.24% maximum drawdown in Jan 2024-Jul 2026 backtests of a leakage-controlled U.S. equity long/short pipeline using approximately 100GB of point-in-time WRDS, LSEG, and SEC data after modeled trading, financing, and borrowing costs
- SPY Machine Learning Strategy and Backtesting Research** ([GitHub](#), [SSRN Paper](#)): Generated 24.6% annualized pre-cost return, a 2.17 Sharpe, and 11.4% volatility in 2023-Jun 2025 walk-forward and bootstrap tests of a LightGBM SPY/cash strategy using 17 macroeconomic and technical signals, versus SPY's 23.4%, 1.45, and 16.2%
- Sector ETF Momentum Strategy** ([GitHub](#)): Returned 13.5% annually with an 18.3% maximum drawdown and 0.81 beta from Jan 2019-Jul 2025 by ranking 11 S&P 500 sector ETFs on three-month returns and rebalancing the top three monthly, versus SPY's 23.9% maximum drawdown
- Breast Cancer Genomics Research:** Achieved 0.87 AUC in Oncotype risk classification using Logistic Regression, Random Forest, XGBoost, LightGBM, and neural networks on METABRIC and TCGA-BRCA data with five-fold and cross-dataset validation plus SHAP/LIME interpretation

ADDITIONAL INFORMATION

Technical Skills: Python (pandas, NumPy, scikit-learn, XGBoost, LightGBM, PyTorch, statsmodels, CVXPY); SQL; R; Git; Excel

Languages: Turkish (native); French (B2); Italian (B1)

Interests: Soccer for 15 years; Music production in Logic Pro, including two live concerts; Tennis through local tournaments; Chess.com Elo 1500; Poker
